(3.) $G=Q \times q \times T$

3.) $G=Q \times q \times T$

($G=Q \times q \times T$) Formula

Mathematical Formula :

**GROWTH = QUALITY x quantity x
TIME**

Growth = The success achieved in the platform of the Internet is called growth. It varies with quality, quantity & time.

Everyone's growth rate is 0 in starting, it increases with the future.

Quality = This is the quality of your content, it also increases with time & experience.

Quantity = Number of content you publish daily.

Time = The amount of time you have been publishing the content.

Understand by example.

Example 1 : If you want to grow your channels/websites/social media then you do this.

- The quality of your content is 1 in starting.

Quality = 1

- The quantity for uploading daily content is 1.

Quantity = 1

- Let the timing also be 1.

Time = 1

Then your growth
“ $G=Q \times q \times T$ ” will be like
this.

Growth = $1 \times 1 \times 1$

Growth=1 DEWA Unit

Example 2 : You follow this method to grow.

- The quality of your content is 1 in starting.

Quality = 1

- The quantity for uploading daily content is 3.

Quantity = 3

- Timing is also 1.

Time = 1

growth now

Growth = $1 \times 3 \times 1$

Growth = 3 DEWA Unit

See, the growth rate here is 3 times higher than before.

Example 3 : Growth rate after few months.

- After a few months the quality of your content will be 3.

Quality = 3

- Daily uploading quantity is 3.

Quantity = 3

- It's been 3 months since you published the content.

Time = 3

Growth = $3 \times 3 \times 3$

Growth = 9 DEWA Unit.

This growth rate is 9 DEWA.

This tells you that you have to grow in the internet.

So you depend on the quality, quantity and timing of content publishing.

DEWA Unit

The unit of growth is DEWA.

The reason for Grow being the Unit Dewa is that the more Dewa (Deadline Entrepreneur Working Always) will be the more signals will go in your mind that you have to finish the work as soon as possible, saying that you will do it with full concentration. Deadline Entrepreneur Working Always

If you have to grow fast now, then you cannot bring back the time which has passed and talking about quality,

it will increase with time and now the last option is your quantity.

So now you have to increase the quantity, only then maximum result will come in less time.

Now it must be coming in your mind that if you want to be successful in less time then you will have to increase the quantity.

So how to increase the quantity?

You will know this later.

For Example Right now you have to post any particular niche/interest/according content of knowledge and then you have less amount of time.

So you have to increase the quantity but keeping the quality in mind, otherwise your efforts will go in vain

with this formula, the content of your blog & channel will grow and reach more and more people.

And you know that the more content you have, the more your earning ability will increase and you can easily convert those people to any product.

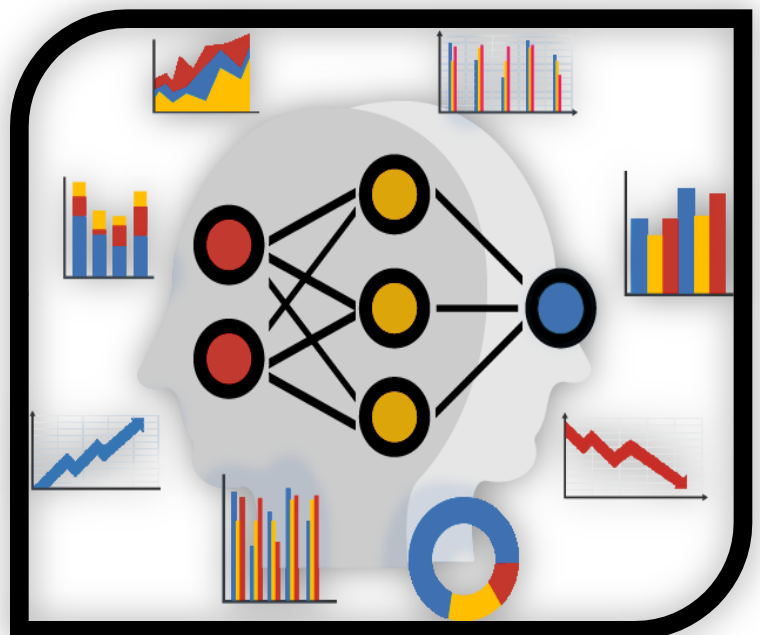

If you look carefully, it has been a long time since all those websites & channels are ranking in the search list for publishing content and when it's a long time, their content quality will also be good and if you look at the content number, then you will know that their content is also a lot and separately their timing is also very long ago.

And Google & Search Engine also follows this logic.

Here also the quantity matters along with the quality.

If you yourself carefully analyze the $G=Q \times q \times T$ formula, then you come to know that.

If you have to grow fast now, then you cannot bring back the

time which has passed and talking about quality,
it will increase with time and now the last option is your quantity.

So now you have to increase the quantity, only then maximum result will come in less time.

Now it must be coming in your mind that if you want to be successful in less time then you will have to increase the quantity.

Now let's talk about Power of Continuity

(13.) POWER OF CONTINUITY

13.) Power Of Continuity

Look friend, now you have come to know the complete strategy, how to use this strategy and move forward.

But friend, this is a work that you have to do every day, no matter what happens.

If you do not reduce your work even for a day, then it can be a big loss for you, That's why you have to do daily work, otherwise your daily growth rate will go down and you will not get the result..

I am sharing some motivation lines with you.

Which you will get motivation towards your work and you will not skip in the middle.

So that line is like this.

- 1.) If you want to be successful then you have to know everything that every successful people know But if you want to be more successful than successful people, then you also have to know that which successful people do not know.**

Explainaton : It's true that if you want to be successful, then you want to be like whoever you want to be, You have to do like him, then one day you too will be successful.

If you keep working on the constants, then the whole algorithm will be sure to you that the person is strong or the man works very hard. They should be boosted by speaking you will start boosting, then you will go on moving towards success. Then one will get all the things that you are thinking of now.

- 2.) It is better to dig a pit of 1-1 meter at 100 places than to give yourself digs a pit of 100 meters at 1 place.**

Explanation : There is a person who digs a pit of 1-1 m at 100 places, and there is a person B who digs a pit of 100 m at the same place..

So out of that, Person A does not get anything on a pit of 1 meter, while on the other hand,

Person B gets water at a pit of 100 meters..

Similarly, we do not have to do a little work in many places in starting. Rather, work at one place with full focus so that the result can be obtained quickly.

Then when you start getting results, you can increase your work one by one. So that you can focus on it properly, our mind also works in this way.

That it starts to decrease the interest & focus power towards the work by doing too many things at once. And work seems boring and when you start finding your work

boring then you will not be able to do your work well. And when the result is bad then money generation will not be possible.

3.) **No one can beat what you have won from you.**

Explanation : Really man if you really want to achieve something big So for this, first you have to win from yourself, the day you win yourself, from that day you start your goal and run..

Let's understand it in this way, two people live at one place, Persona & Persona B.

The knowledge of both was of a very high level.

Only one thing was different between the two of them, Who was as much as himself.

Both used to make daily targets that what they have to do today.

From which the person used to start his work, then he used to focus on his work for some time. But as soon as any distraction came to him, he would get diverted. , Like his friends used to say that let's have a party or go for enjoy. , Or when we go to see the film, the person used to go with those people, he used to forget

that his work is yet to be done. But because of his enjoyment, he used to lose himself to you that his work was more important now.

On the other side, Person B used to work hard day and night, he did not go for a walk with friends, did not go to see movies. Even at night, he used to work hard by working overtime.

This is how he used to walk, then one day Person B becomes a very successful

On the other side, person A was still the same, he had not achieved his goal yet. Then suddenly both of them meet one day then the person A says that we both had the same knowledge.

But what did you do that I could not do and you were successful and I am still the same.

Then Person B said that I have won the victory by myself., Daily when I used to have distractions like partying with friends, going for enjoy or watching a movie I used to fight with myself to avoid all these things and used to say that I do not know, I have to focus on your goal.

While doing this, you used to fight with you daily and focused only on your work, then while doing this, the success became achieved. But my fight with myself is still going on, I fight with myself daily,

I want to go further. I don't want to be in the comfort zone. By this you must have understood that if you have to achieve something in life, then you have to win from you and only work hard. Then automatic success will come running.
